

**TITLE OF THE PAPER**  
**[Times New Roman-12-bold/Caps]**

Given Name Surname(First Author)\*<sup>a</sup>, Given Name Surname<sup>b</sup> and Given Name Surname<sup>a</sup>

<sup>a</sup> Institution/Department, Affiliation, City, Country

<sup>b</sup> Institution/Department, Affiliation, City, Country

Corresponding Author's Name\* (his/her email address)

**First of all, write the Paper ID above.**

**Please write down your abstract here in between 300 to 400 words without first indent. This electronic document provides a “live” template and defines the components of your paper [title, text, heads, etc.] They are intended to guide the authors in preparing camera-ready hardcopy and electronic form of their papers. Do not indent any part of the abstract except for the first line. [Times New Roman-10, bold]**

**Keywords:** word1, word2, word3, word4, word5

### Introduction

English is the official language of the symposium. This template provides authors with most of the formatting specifications needed for preparing electronic versions of their papers. The authors are responsible for the content, originality, and style. Give an introduction to the work presented in the paper. [Times New Roman-10]

### Materials and Methods or Pedagogy

*Length:*

Authors are invited to submit either a Short Paper or a Full Paper in accordance with the following page limits.

Short Paper

Minimum length: 1 page

Maximum length: 2 pages

Full Paper

Minimum length: 3 pages

Maximum length: 6 pages

This is the template for Short Papers. Short papers should concisely present preliminary results, novel ideas, work-in-progress, or focused technical contributions. Despite the shorter length, submissions must clearly state the research motivation, methodology, key findings, and significance of the work.

*Keywords:* Place four to five keywords from the manuscript under the abstract. Enter them in lower case except in special cases such as abbreviations, and insert a comma after each keyword, [Times New Roman-10, italic]

*Style:* Use sections for the introduction, materials and methods, results, discussion, conclusion, and acknowledgements (if applicable). Section headings should be bold, centered, without indentation, with one blank line before and after each heading. Only one level of heading should be used.

*Body text:* Use 10 point Times New Roman throughout. Use italics only to emphasize special parts of the text. To start a new paragraph, indent 5 mm from the left margin (there is no need to insert a blank line).

*Tables and Figures:* If necessary, paste tables and figures across both columns (as close as possible to where they are referred to in the text). Number the tables and figures consecutively using Arabic numerals (e.g., Table 1, Table 2, Figure 1, Figure 2), and provide a caption for each table and figure. Place the caption above the table and below the figure. Use 8 point Times New Roman for labels of Tables and Figures. Leave one line before the caption and one line after the caption. Do not indent or center the caption. Note the difference between tables and figures: Tables contain only alphanumeric characters and no graphic elements.

*References:* References in text should be author and date:

... Wilson (2000) makes this distinction ...

... Wilson, Hodges, and Jackson (2000) found that ...

... the point is discussed in several places (e.g., Allen and Corder, 1975; Stern, 1983).

Please list all of your references in alphabetical order in the reference list. Examples of references from different sources are shown below.

## **Results and Discussion**

Remember the followings: do not end a page with a heading, do not start a page with an incomplete line, do not underline any part of the text, and do not forget to check the spelling.

## **Conclusions**

In the conclusion of your paper, please describe the results of your survey and preliminary findings, so that the reader can understand the final outcome of your work.

## **Acknowledgements**

You may include acknowledgement here (when appropriate) the organisations who have funded or extended their facilities for doing the research work.

## **Approval Certificate**

You will need to submit an approval certificate for the purpose of preserving and publishing the symposium records. Even if you submit an approval certificate, the copyright for all content included in the paper will belong to the author and/or affiliated institution. Please delete this paragraph before submitting the final full paper.
